NEDC: CO2 emission: 343 g/km ; Fuel consumption: 18.8 mpg / 15 l/100km [*]
WLTP: CO2 emission: 359-347 g/km ; Fuel consumption: 17.9-18.6 mpg / 15.8-15.2 l/100km [#] [1]

[1]The figures on fuel consumptions and CO2 emissions shown are determined according to the European Regulation (EC) 715/2007 in the version applicable at the time of type approval. Figures are intended for comparability purposes. The fuel consumption you achieve under real life driving conditions and CO2 produced will depend upon a number of factors including the accessories fitted after registration, variations in driving styles, weather conditions and vehicle load.

The figures marked with (*) are based on the new test (WLTP) and are translated back into outgoing test (NEDC) in order to ensure a comparison between the vehicles.

The figures marked with (#) are already based on the new test (WLTP).

For the assessment of taxes or other duties based on CO2-emissions, the CO2 figures may differ to the figures stated here. The figures shown consider optional equipment and the different size of wheels and tyres available on the selected model and may vary during the configuration.
